An archives RRD procedure has been completed and submitted to DCC Nixon (end Sept 2018). Further work is being completed at the request of DCC Nixon on risk assessing and prioritising disposal of records prior to a final decision. The responsibility for this overall risk sits jointly between the Information Management MoPI team and the Archives team. Operation Halo2 archives aims to prepare operational archives for transfer to the EPAC centre in June 2019.

This involves reviewing, cataloguing, scan and bin, dating and grading all undetected crime files at Mansfield house archive store and files where offences are to be prosecuted or have been prosecuted at Tigers Road. It also involves reviewing potentially 100,000 back record converted crimes from CIS that have been MoPI graded by the regional RRD team, locating the relevant files & media material, retrieving the specific files and preparing them for disposal subject to IICSA/UCPI approval. This operation requires staff. 2 full time MoPI staff are to be provided. A business case for 3 full time temporary staff for 12 months has been submitted to the October Change board and approved.

20/06/18 20/18 c C Martin Henry to generate a comprehensive list of all the strategic risks relating to the OPCC and provide a report at the JARAP meeting in September 2018.

used within normal management processes.

1) The process is over and above simple management intervention. It is a layered approach in operation by the Evidential Property and Archive Manager.

i. An issue is brought to the attention of the Evidential Property Supervisor. The issue is usually flagged via a weekly audit review or by the daily collections from the Temp Evidential Stores by the Evidential Property Couriers.

ii. The issue is risk assessed in terms of seriousness. If it is a minor breach of procedure it is dealt with by the Supervisor who liaises directly with the staff members supervisor to bring the matter to a conclusion.

iii. If it is a more serious matter then the Evidential Property Supervisor brings the issue to the attention of the Evidential Property Manager. Cash/firearms/drugs issues are always dealt with as serious matters.

iv. The manager assesses the issue and either deals directly or informs PSD who would then take the investigative lead.

v. If the manager deals directly, she initially contacts the officer/staff members manager to request a local investigation of the issue. A report
response is required. The large majority of issues are dealt with satisfactorily at this point, with the officer/staff members line manager giving words of advice, PDR consideration etc. in line with standard reprimand procedures. Unsatisfactory results at this point (to be honest rare) are referred to either PSD or for senior management consideration/intervention.

DS Emma Matts has dip-sampled 58 cash seizures from property and can say that in 79% (46/58) of cases exhibits are either counter signed by a 2nd officer and or the seizure is recorded on Body worn video. Of the other 12 these were all for situations such as recovery of a single note of a small denomination, for example a £5 handed into a Front enquiry office where staff are single crewed and where CCTV covers the desk. Other situations included single crewed officers attending a sudden death and recovering a small amount of loose change from the deceased upon searching them on behalf of the coroner.
