Mrs Saunders  March 2017  28.02.17 – Update provided by Jason Ross, Contact Management Chief Inspector (risk owner):- It is difficult to identify an average time as it can change depending on the time/day, general volume of calls and staffing numbers. Whilst there is no national target, there is a force set target of answering calls within 30 seconds. However, this is being reviewed as this was set some time ago and since then the process in recording information over the phone during initial calls has increased, increasing the average length of incoming calls. Therefore the target is being reviewed.

17.3.17 – Discussed at JARAP – action to remain open. Member invited to attend PDG to gain assurance on how this area of performance is being monitored.

22.05.17 – The risk owner has provided the CMD 17/18 delivery plan which includes the following:- There is a historic target in relation to 101 performance to answer 85% in 30 seconds, YTD performance stands at 61%. The primary objective in order to improve performance as outlined in previous sections is to embed the new shift pattern to better align demand and resources combined with the correct establishment supported by over-recruitment to manage attrition.

18.08.17 – The risk owner updates as follows: - Over the last 3 months we have
seen a month on month improvement in relation to call taking, both 101 and 999. This has been backed up by BT who say they have seen a significant improvement in our 9's performance also. In terms of recruitment and HR sickness is down and numbers of staff are up. We have agreed a recruitment process with HR and EMCHRS for 4 intakes a year for 2018.

14.09.17 - Action on going. Mrs Saunders to provide figures on strategic risk as detailed within the 18/7/17 update on the rolling action sheet regarding improvements over the last 3 months for call taking and sickness.

15.11.17 – The figures for answering 101 call within 30 seconds are as follows: -
May 2017 – 43.7%
August 2017 – 72.1%
November 2017 – 82.8%
The abandonment rate for 101 calls are: -
May 2017 – 20.5%
August 2017 – 6.9%
November 2017 – 3.9%
The sickness rate has decreased from 14.7 days lost on average over the year to 13.4 days (as at September 2017).

30.01.18 – The figures for answering 101 call within 30 seconds are as follows: -
December 2017 – 84.5%
January 2018 – 83.2%
The abandonment rate for 101 calls are: -

<td>Mr Bannister</td>
<td><strong>30.01.18</strong> – Discussed with Head of Health and Safety – We cannot directly link a reduction in accidents to training in a causal manner. We might be able to track some behaviours of manager’s pre and post training but this would be quite patchy. We have some legal minimums that we need to meet which is one of the main drivers for providing this training. A lot of our accidents are associated with assaults and conflict resolution and, while we do our best to manage them they are sometimes unavoidable when trying to make arrests. An improvement in culture brought about by training may also increase accident reporting ad people engage more. The police service has a general problem with under reporting especially regarding assaults so an increase is foreseeable.</td>

<td>30.01.18 – This risk was created in January 2010 with a rating of low. In March 2010 it rose to medium with the rationale - collaboration work had exposed the vulnerability of the Job Evaluation Scheme to the region. Later in March 2010 it reduced to low as appropriate communications had been shared regionally to minimise the risk of equal pay claims. It remained as low until September 2017 when it increased to high. This was due to the outcome of the Hay</td>
